

Melting Ice Game On In Seattle: Seattle Sockeyes Feel the Heat

The Ice is Melting, and the Seattle Sockeyes are Feeling the Heat

The melting ice in Seattle is a sign of climate change, and it's having a big impact on the local sockeye salmon population. Sockeye salmon need cold, clear water to survive, and as the ice melts, the water temperature rises and the water becomes more turbid. This makes it difficult for sockeye salmon to find food and reproduce.

In recent years, the number of sockeye salmon returning to Seattle has declined significantly. In 2014, only 23,000 sockeye salmon returned to the city, compared to an average of 250,000 fish in the 1990s. This decline is due in part to the melting ice, but it's also due to other factors, such as overfishing and pollution.

The melting ice is a serious threat to the Seattle sockeye salmon population, and it's something that the city needs to address. The city is working to reduce its greenhouse gas emissions, which will help to slow the melting of the ice. The city is also working to restore salmon habitat and reduce pollution.

What Can You Do to Help?

There are a number of things that you can do to help the Seattle sockeye salmon population. Here are a few ideas:

- Reduce your greenhouse gas emissions. You can do this by driving less, using less energy, and eating less meat.
- Support organizations that are working to protect the Seattle sockeye salmon population. There are a number of great organizations that are working to protect the sockeye salmon, such as the Seattle Aquarium and the Puget Sound Salmon Recovery Council.
- Volunteer your time to help restore salmon habitat. There are a number of organizations that are looking for volunteers to help restore salmon habitat. You can find these organizations by searching online or by contacting your local fish and wildlife agency.

The Future of the Seattle Sockeyes

The future of the Seattle sockeye salmon population is uncertain. The melting ice is a serious threat, but it's something that the city is working to address. With the help of the community, the city can protect the sockeye salmon population and ensure its future.
