Print length	: 302 pages
Paperback	: 70 pages
Item Weight	: 5.6 ounces
Dimensions	: 6 x 0.18 x 9 inches

The book is divided into four parts. The first part provides an overview of the transport problems of the Soviet Union and Eastern Europe, including a discussion of the historical, economic, and political factors that have shaped these problems.

The second part of the book examines the development of transport infrastructure in the Soviet Union and Eastern Europe, including the

construction of railways, roads, waterways, and airports.

The third part of the book analyzes the operation of transport services in the Soviet Union and Eastern Europe, including the provision of passenger and freight services.

The fourth part of the book discusses the future of transport in the Soviet Union and Eastern Europe, including the challenges and opportunities that these countries face in developing their transportation systems.

This book is a valuable resource for anyone interested in the transport problems of the Soviet Union and Eastern Europe. It provides a comprehensive analysis of the challenges faced by these countries in developing and maintaining their transportation systems, and it offers insights into the future of transport in these regions.
